### **MAIN STREET URBAN CONCRETE REHAB PROJECT**

Beginning Thursday, January 15, 2015, A-Tech Paving under contract with the City of Norman will begin replacing various concrete panels on Main Street. The contractor will begin to replace the concrete in the inside lanes of Main Street between Mercedes Drive and Berry Road. Barricades will be placed to protect the workers and the traveling public in the construction area. Citizens are urged to use alternate routes, as delays can be expected. Weather permitting this phase of the project should be completed by February 2015.

The Main Street Urban Concrete Rehab Project is an \$809,000 street improvement project. This project was one of four projects included in the Norman General Obligation Bond Election of March 2010. The rehab project will replace the damaged concrete panels on Main Street from Berry Road to 48<sup>th</sup> Avenue West. The project is scheduled to be completed by August, 2015.

Additional questions may be directed to Mr. Josh Malwick, City of Norman Capital Projects Engineer, at (405) 366-5454 or [Josh.Malwick@NormanOK.gov](mailto:Josh.Malwick@NormanOK.gov).
